

“Education and awareness-raising activities towards the school population (students, teachers and their families) are fully part of the project”

The EU Islands Facility NESOI is pleased to introduce the clean energy projects receiving its support:

E(40)Sco

Energy efficiency in 40 Schools Supports Community

Country  ITALY	Island SARDINIA	Project promoter Municipality of Cagliari	Sectors Energy efficiency Energy Community	Project value 3,820,000 €
---	----------------------------------	--	---	--

What is the project about?

- The project consists of a diversified intervention plan involving about half of the school buildings in the city of Cagliari, around which energy communities can be created.
- The project will include: renewal of technological systems, construction of photovoltaic generators sized to obtain substantial energy autonomy, inclusion of building automation for intelligent management, consumption monitoring and remote control of technological systems.

How will the EU Islands Facility NESOI support the project?

- Assessment of existing technical data and studies
- Assessment on existing studies on economic and financial sustainability
- Regulatory/legal analysis and assessment of existing procurement options (e.g. tender, PPP, etc.), with particular focus on the possibility to combine EPC and energy communities
- Completion of technical and administrative documents for public tender procedure
- Support in contract signing (EPC)
- Guidelines to create of energy communities around each school buildings
