

“ The project will not only boost touristic activities but also serve the needs of local households facing energy poverty issues ”

The EU Islands Facility NESOI is pleased to introduce the clean energy projects receiving its support:

## SCGM NaKou

Smart, clean and green marinas in Naxos and Koufonisi

### What is the project about?

- The project consists in the development of two smart, clean and green marinas by transforming port infrastructures in Naxos and Ano Koufonisi islands.
- Small electric tourist boats for leisure activities, EVs and e-bikes for local transportation will be provided at each marina.
- Additional services at the marinas will include smart street lighting systems, modern green waste collection points, WC and shower facilities and fire-extinguishing network.
- The marinas' infrastructures will be served by smart microgrids, properly orchestrated by a smart management platform.

### How will the EU Islands Facility NESOI support the project?

- Assessment of the key project sizing drivers
- Identification of suitable technological options given existing project sizing requirements
- Definition of the required environmental permitting procedures
- Cost Benefit analysis and socioeconomic and environmental impact evaluation
- Definition of the technical, economic and financial, fiscal project inputs
- Risk analysis and identification of available mitigation strategies
- Assessment of existing procurement options (e.g. tender, PPP, etc.)
- Financial modelling and identification of target scenario
- Identification of financing/funding options
- Action plan and identification of project monitoring procedures
